PROFILE

Hi! My name is Kiran Kunigiri. I've been an iOS and web developer for 3 years, and I make cool new projects everyday (see my website). I live in California in the Silicon Valley and I'm a junior at Cupertino High School.

EDUCATION

Cupertino High CA, 2014-2018

EXPERIENCE/PROJECTS

Summer Internship at Netgear - 2017

At Netgear, I helped with the development and testing of a new mobile application that controls their routers.

Color Cabinet (Product) - 2017

Color Cabinet is an advanced color management application for designers on iOS and Mac. It utilizes Wifi and USB for realtime communication between devices. It is published on the App Store and available for download (see website).

Summer Internship at Lumentum - 2016

At Lumentum, I designed and developed multiple iOS apps: one that helps the HR team manage the onboarding process for new employees; another to enable employees to contact the building security team in case of an onsite emergency.

Tinovation, iOS/Web Tutor - 2015 - Current

Tinovation is a programming club where we teach over 60 students how to code and develop applications. As an officer, I teach and create new curriculum and projects.

Make School Summer Academy, Palo Alto CA - 2015

At the Make School Summer Academy, I learned advanced iOS development and built the task management app, Quest.

APCS Cupertino High - 2015

At Cupertino High, I completed the AP Computer Science course and received a perfect 5 on the exam.

FBLA Nationals
Digital Video Production, 3rd Place - 2017
E-Business, 8th Place - 2015

I won 1st statewide and 3rd nationally in DVP, in which I created a new movie trailer. I also won 1st statewide and 8th nationally in E-Business, in which I built an E-Commerce site where people can buy and sell art online.

Other Projects and Products

I have 4 apps on the App Store with over 5,000 downloads (more information is on my website). I also have many open source libraries that other people use, such as animation frameworks and connectivity (wifi/bluetooth/USB) libraries!

Skills

Leadership, iOS, web, and game development, Objective C, Swift, Javascript, Java, user interface design, music composition, video editing (After Effects/Premiere Pro)
